

BALAJI GUGGILAM

Manual Testing Engineer

Bengaluru, India | +91 8790233572 | balajiguggilam97@gmail.com

SUMMARY

Senior Quality Control Analyst with around 5+ years of experience in manual QA for web and mobile applications across healthcare, travel and compliance domains. Designed comprehensive test plans and executed 500+ test cases per release, driving a 30% drop in API defect escapes while strengthening defect management. Implemented a structured regression suite that cut post release defects by 25% and boosted application stability by 20% through cross device testing. Consistently delivered high quality releases by applying rigorous Manual Testing, Test Execution and stakeholder collaboration.

SKILLS

QA Methodologies & Types: Functional Testing, Integration Testing, System Testing, Regression Testing, Sanity Testing, Smoke Testing, UAT, Negative Testing, Migration Testing, End to End Testing, Cross browser Testing, Cross device Compatibility Testing, Agile (Scrum), SDLC, STLC, Manual Testing

Test & Defect Management: Test Plan Authoring, Test Case Design, Test Scenario Identification, Test Execution & Reporting, Defect Logging, Defect Tracking, Defect Prioritization, Bug Lifecycle, Root cause Analysis, JIRA, Defect Management, Test Management Tools, Test Case Creation, Test Execution, Test Reporting

API & Mobile Testing: Postman, REST API Validation, Real Device Testing, Charles Proxy

Automation & CI/CD: Selenium, Playwright, Codegen AI, CI/CD Pipelines, Build Triggers, Test Integration

Documentation & Collaboration: Release Notes, Usage Notes, Daily Status Reports, Weekly Status Reports, QA Compliance Documentation, Google Workspace, Microsoft Office (Word, Excel)

Environments & Tools: Windows, macOS, Google Chrome DevTools, Firefox Developer Tools, Safari Web Inspector, Environment Configuration, Build Verification

EXPERIENCE

APPLAUNCH BANGALORE PVT. LTD.

SR. QUALITY CONTROL ANALYST

Bengaluru

May 2022 – Present

- Designed and executed comprehensive Manual Testing, including Test Case Creation and Test Execution, for MyBabyWish, utilizing Software Testing Life Cycle (STLC) principles to ensure thorough coverage of fertility tracking, ovulation monitoring, and pregnancy modules.
- Performed Functional Testing, Integration Testing, Regression Testing, and System Testing on Mac (macOS) and other platforms, executing over 500 test cases per release cycle for MyBabyWish, with a focus on Defect Management and Test Reporting.
- Validated REST APIs for critical healthcare workflows (consultation booking, user onboarding, subscription) using Postman, reducing API related defect escapes by 30% for MyBabyWish.
- Implemented structured regression suite, contributing to a 25% reduction in post release defects over 6 months of iterative releases for MyBabyWish.
- Performed cross device and cross browser compatibility testing across 10+ device/OS combinations, improving app stability scores by 20% for MyBabyWish.
- Owned patch releases end to end — authored Release Notes and Usage Notes; coordinated UAT and production validation for each deployment of MyBabyWish.
- Developed and implemented a defect prioritization framework, applying Stakeholder Management principles to collaborate with teams, and reduced average defect resolution time by 15% for MyBabyWish, demonstrating effective Defect Tracking and Test Management.
- Reviewed test cases authored by team members, enforcing QA standards and ensuring 95%+ test coverage for each sprint for MyBabyWish.
- Authored and executed Test Plans for tour creation, ticket purchase, and private tour customization workflows for Nice Guides (Sightwalk).
- Performed Functional, Integration, Regression, Negative, and System Testing for Nice Guides (Sightwalk) — achieving 90% regression pass rate consistency across sprints.
- Defect logging, tracking, and on time escalations contributed to a 20% improvement in overall build stability before UAT handoff for Nice Guides (Sightwalk).
- Prepared daily execution reports and provided a collective team status summary to management for Nice Guides (Sightwalk).
- Tested compliance questionnaire workflows, audit documentation, and inspection modules for accuracy and completeness for The Easy One (Manuel).
- Executed Integration, Regression, Negative, and End to End testing for The Easy One (Manuel) — defect density reduced by 18% after introducing structured negative test scenarios.
- Maintained defect and test management tool records throughout the full defect lifecycle; handled multiple parallel workstreams simultaneously for The Easy One (Manuel).
- Reviewed test cases across the team, ensuring QA documentation aligned with compliance and audit requirements for The Easy One (Manuel).
- Contributed to testing for additional projects including Wakemate, Augenzeuge, Shorli, Hezo, Camiino, Dayas, Goofy, BGM, Holistic Cloud, Wilm, Horse In Motion, Oyla, Meet2, BWvormagen, Kiiviiv, Kickscout, KZR.
- Utilized Test Management Tools to track and manage defects, ensuring near complete coverage of testing lifecycle, and applied Analytical Skills to identify and resolve defects, demonstrating effective Problem Solving and Communication skills in collaboration with stakeholders.
- Conducted thorough Test Case Creation, Test Execution, and Test Reporting for MyBabyWish, ensuring comprehensive coverage of software testing lifecycle, and applied Defect Management principles to identify, track, and resolve defects, utilizing Test Management Tools to streamline the process.

WNS GLOBAL SERVICES

Chennai

GRADUATE TRAINEE – IT

Feb 2021 – May 2022

- Gained foundational QA and IT support experience; contributed to testing and quality assurance activities in a large scale BPO environment.

EDUCATION

LOVELY PROFESSIONAL UNIVERSITY

Phagwara

B.Tech – Mechanical Engineering

Aug 2016 – May 2020

- CGPA: 5.95
