

BALAJI GUGGILAM

Sr. QA Analyst & Business Analyst · Manual Testing · Requirements & Scope · Web · Android · iOS · Desktop

+91 8790233572 | balajiguggilam97@gmail.com | Bengaluru, India

PROFESSIONAL SUMMARY

Results-driven Senior QA Analyst & Business Analyst with 5+ years of experience delivering high-quality software across healthcare, travel, compliance, e-commerce, and IoT domains. Proven track record owning end-to-end QA cycles — from test planning and API validation to UAT coordination and release management — while also driving requirements engineering: translating UI designs into scope documentation, leading client requirement-gathering sessions, obtaining sign-off, and enabling development teams to execute with clarity. Platforms: Android, iOS, Web, and Desktop.

~30%

Fewer API Defect Escapes

~25%

Post-Release Defect Reduction

~20%

App Stability Improvement

95%+

Test Coverage Per Sprint

CORE COMPETENCIES

Test Strategy & Planning

Functional & Regression Testing

Smoke · Sanity · Negative · E2E

REST API Testing (Postman)

JIRA · DevTools · Charles Proxy

Migration & Integration Testing

Cross-Device & Cross-Browser

Desktop Testing (Win & Mac)

Agile / Scrum · SDLC · STLC

Defect Lifecycle Management

Requirements Gathering

Scope Documentation

Client Communication

Stakeholder Sign-off

BA · QA Dual Role

PROFESSIONAL EXPERIENCE

Sr. QA Analyst & Business Analyst · Applaunch Bangalore Pvt. Ltd., Bengaluru

May 2022 – Present (4 yrs 1 mo)

MyBabyWish — Healthcare & Fertility App Android · iOS · Web

Live: [iOS App Store](#) · [Google Play](#)

- Sole QA owner for 500+ test cases per release — test planning through UAT sign-off — reducing release risk for a live healthcare product.
- Validated REST APIs for consultation booking, onboarding & subscription billing via Postman, cutting API defect escapes by ~30%.
- Built regression suite driving ~25% reduction in post-release defects over 6 months; maintained 95%+ test coverage per sprint.
- Cross-device testing across 10+ device/OS combos improved app stability by ~20%; 4-tier defect prioritization cut resolution time by ~15%.

Nice Guides (Sightwalk) — Travel Tour Booking App Android · iOS · Web

Live: [iOS App Store](#) · [Google Play](#) · [Web](#)

- Designed test plans for tour creation, ticket purchase & custom tour workflows — achieving ~90% regression pass rate; escalations improved build stability by ~20% before UAT.

The Easy One (Manuel) — Compliance & Inspection Software Android · iOS · Web · Desktop

Live: [iOS App Store](#) · [Google Play](#) · [Web Portal](#)

- ▶ Tested compliance questionnaire workflows & audit modules; structured negative test scenarios reduced defect density by ~18%.
- ▶ Executed desktop testing on Windows & macOS: installer validation, offline sync & UI responsiveness under enterprise conditions.

Korb Now — *E-Commerce & On-Demand Delivery App (Germany)* **Android · iOS**
 Live: [iOS App Store](#) · [Google Play](#)

- ▶ E2E coverage across cart, checkout, payment gateway & order confirmation; validated Wallet integration and delivery vs. pickup fulfilment flows across success/failure scenarios.

Gasolina — *IoT Gas Cylinder Monitoring App* **Android · iOS**
 Live: [iOS App Store](#) · [Google Play](#)

- ▶ Tested BLE sensor pairing, real-time LPG data transmission, edge cases for signal loss, multi-sensor management & low-fill push notification triggers.

Hezo Scan (HEZO Cycling) — *3D Foot Scanning App for Custom Cycling Shoes* **iOS**
 Live: [iOS App Store](#)

- ▶ Validated guided foot-scan workflow (camera calibration → capture → submission), scan quality detection logic, and regression across iOS versions and device models.

Business Analyst Responsibilities — *Practised across all client projects*

- ▶ Analysed UI designs and wireframes to draft scope documentation, translating visual concepts into structured functional requirements for development teams.
- ▶ Led client-facing requirement-gathering sessions — identifying goals, workflows, and constraints — to build a shared, unambiguous understanding of project scope.
- ▶ Consolidated and refined requirements iteratively, resolving gaps between client expectations and technical feasibility; secured formal sign-off before development kick-off to eliminate mid-sprint scope changes.
- ▶ Served as the communication bridge between clients and the development team — relaying approved requirements, clarifying queries, and coordinating feedback loops throughout implementation.

Other Projects: *Wakemate · Augenzeuge · Shorli · BGM · Holistic Cloud · Wilm · Horse In Motion · Oyla · Meet2 · BWvormagen · Kiiviv · Kickscout · KZR · Camiino · Dayas · Goofy*

Graduate Trainee – IT · WNS Global Services, Chennai
Feb 2021 – May 2022 (1 yr 3 mo)

- ▶ Contributed to QA and IT support in a large-scale BPO environment; built foundational skills in defect tracking, test execution, and Agile team workflows.

TECHNICAL SKILLS

Testing Types: Functional · Integration · System · Regression · Sanity · Smoke · UAT · Negative · E2E	Platforms: Web · Android · iOS · Desktop (Windows & macOS) — cross-browser, cross-device & desktop testing
API Testing: Postman — REST API validation, end-to-end workflow testing, request/response verification	IoT Testing: BLE sensor connectivity, 3D scan data pipelines, device-cloud integration, edge-case & offline testing
Tools: JIRA · Postman · Charles Proxy · Chrome/Firefox DevTools · Safari Web Inspector · Google Workspace	Automation: Selenium & Playwright (basic) · Codegen AI — AI-powered test script generation
CI/CD: Basic knowledge — build triggers, test integration, deployment workflow pipelines	Methodologies: Agile (Scrum) · SDLC · STLC — sprint-based delivery & UAT sign-off
Desktop Testing: Windows & macOS application testing — installer validation, offline data sync, UI responsiveness	Defect Mgmt: Bug lifecycle management, defect logging, prioritization, root-cause analysis, developer coordination
Documentation: Test Plans · Release Notes · Usage Notes · Status Reports · QA Compliance Docs	E-Commerce: Cart & checkout flows, payment gateway, inventory & order management, fulfilment validation
Business Analysis: Requirements gathering, UI-based scope documentation, client communication & stakeholder sign-off	BA Tools & Process: Scope docs · FRD drafts · Wireframe analysis · Client sessions · Sign-off workflows
